RECENT PROJECTS

In Development- Stripe Marketplace App

Co-Developer- Working with a client in the security and fraud detection space, we are developing an app for the Stripe Marketplace which will integrate our client's internal APIs with Stripe to provide and enhancedcustomer management experience and a payment flow featuring additional security and indemnification.

Client in education space- DB/DBMS/Payment Processor Migration

Lead Developer- Multi-part migration involving the migration of multiple subsidiary DBMS data sets into a consolidated location within Zuora and tokenizing the data to integrate Stripe as a payment processor.

Client in legal space- Custom UI design/dev/deploy, Custom Auto-Pay Process, Payment Processor Integration

Lead Developer- Created a custom UI using HTML, CSS and JS, for customer payments. A custom Node auto-pay process was designed and integrated with Stripe as well as a custom financial records manager to work with their internal back end.

WORK EXPERIENCE

Developer Consultant, Senior Developer Consultant

Myers Holum Inc- Stripe Practice 7/2022 -Present

- Entrusted with furnishing consultation, development and deployment, integration, and migration services for clients seeking clean, reliable, and scalable Stripe integrations, custom development, or migration services and support.

Senior Software Engineer

Wells Fargo- DevOps, 11/2021 - 7/2022

- Provided technical support and maintained the configuration management system data for business applications in development, test, and production. Conduct oversight and manage the administration, maintenance, and security of applications in production as well as in lower lanes.
